

**ABSTRACT**

A system for web based imaging comprising: at least one graphic store for storing a plurality of different graphics; a group composition store for storing a plurality of compositions, with each different composition  
5 referencing at least one graphic in a graphic store that is external to the group composition store and including data to place the referenced graphic within the composition; and a plurality of different user profiles, each for a different imaging client, with each user profile including a reference to the group composition store.
